Playing "Spot the Difference" with Springer

Christiane Peters

University of Illinois at Chicago

CRYPTO 2011
Rump Session

Recalling "Spot the Difference" games

Source: `http://games2rule.com/`

Setup:

- Take a document (e.g., a picture).
- Introduce N errors.
- Publish alternate next to the original and tell the player to find the N differences.

“Spot the difference” games for LNCS authors

If you want to play:

- write a paper
- get it accepted at a conference with LNCS proceedings
- send your camera-ready paper to Springer’s “Scientific Publishing Services” (SPS).
- wait for the “final” version of your paper and start comparing.

“Spot the difference” games for LNCS authors

If you want to play:

- write a paper
- get it accepted at a conference with LNCS proceedings
- send your camera-ready paper to Springer’s “Scientific Publishing Services” (SPS).
- wait for the “final” version of your paper and start comparing.

Features:

- The number of errors N will be much higher than in any small flash game on your smart phone.
- You won’t know N in advance.
- You can play several rounds.

Example

- Players: Dan, Tanja, and I.
- Challenge document: article on Smaller decoding exponents: ball-collision decoding

We had the pleasure of playing 3 rounds in which we found 34, 14, and 1 errors, respectively.

Round 1:

My favorites (spoiler alert)

Renaming conferences

- ASIACRYPT 2009 $\rightarrow$ $\mathrm{ASIACRYPT}$ '09.
- CRYPTO'87 $\rightarrow$ CRYPTO 1987

Extra fun: try entering "CRYPTO 1987" and "ASIACRYPT 09" on `http://www.springerlink.com/` and see if you can find the proceedings.

Reversing the order of authors/editors:

- Cohen, G., Wolfmann, J. (eds.): Coding theory and applications. $\rightarrow$

  [25] Wolfmann, J., Cohen, G. (eds.): Coding Theory 1988. LNCS, vol. 3

Can introduce more errors by copy/paste-ing the whole bibliography from the submitted PDF and editing it (rather than using the submitted LaTeX source code):

- A new algorithm for _nding minimum-weight words in

Can introduce more errors by copy/paste-ing the whole bibliography from the submitted PDF and editing it (rather than using the submitted LaTeX source code):

In conclusion:

- I usually do not play “Spot the Difference” games because I consider my time too valuable to do so.
- Sadly Springer’s SPS doesn’t seem to care.
